

Setup Instructions

Need to download:

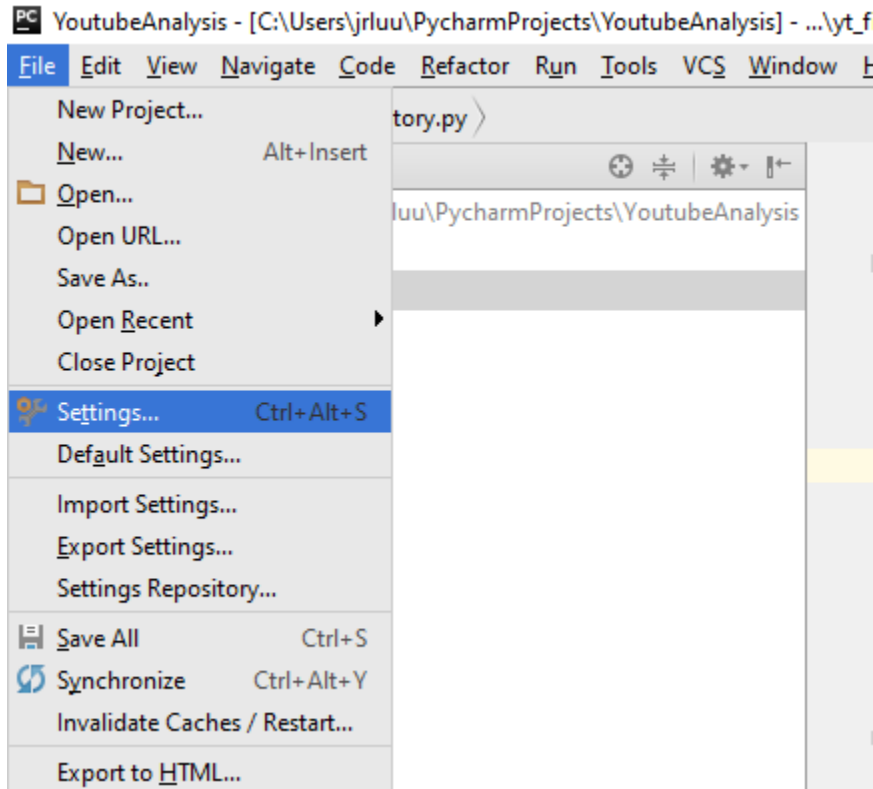

- [Python 2.7](#) (Note: 2.7.x NOT 3.5.x)
- [Chrome Webdriver](#) (Get the one for YOUR operating system)
- [Pycharm](#) (Either [community](#) or [professional](#) is fine)
- [yt_fillhistory.py](#) (The script for the analysis)

Steps:

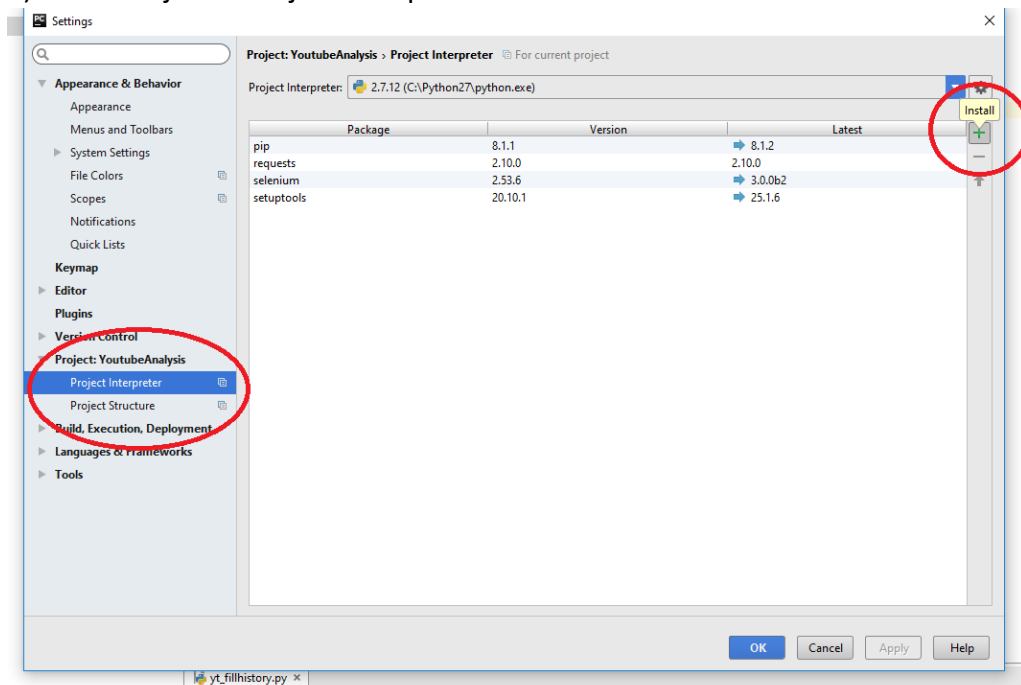

- 1) Download everything above.
- 2) Install Python 2.7
- 3) Install Pycharm
- 4) Open Pycharm and select python 2.7 as your interpreter
- 5) Create a project with python 2.7 as your interpreter
- 6) Extract chrome webdriver and move yt_fillhistory.py to your new project directory. Should look like this after that step

7) Click File -> Setting

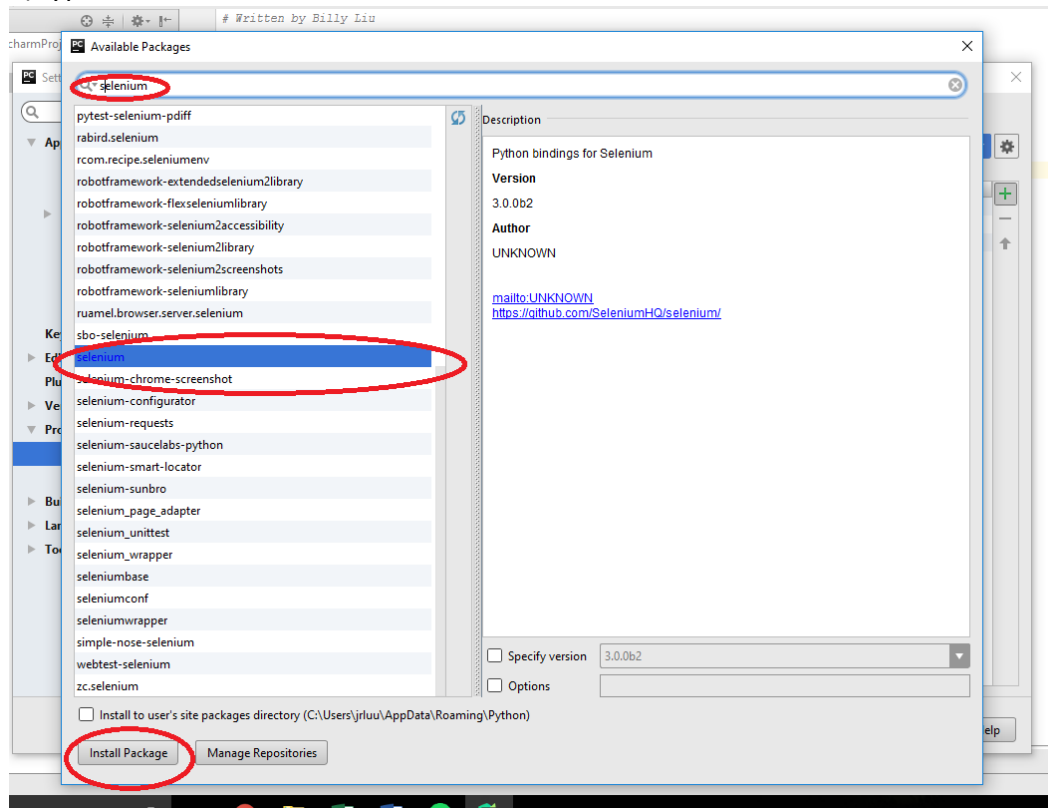

8) Go to Project-> Project Interpreter and click install

10) Type

9) Type in Selenium in the search box, and install it

10) Now exit that, and right click yt_fillhistory.py.

Jonathan Luu

Click “Run ‘yt_fillhistory’” to run.
